

HOW TO HELP WITH... MATHS

MAKE IT THE NORM

Incorporating Maths into every day activities such as shopping and cooking can allow children to become comfortable with simple calculations and see how useful Maths is on a daily basis.

PLAY MATHS GAMES!

Engage children in enjoyable maths games whenever you can. Board games, card games, and online maths games can provide entertaining opportunities for children to enjoy maths. Encourage friendly competition and celebrate small achievements to boost confidence!

CELEBRATE PROGRESS

Acknowledge and celebrate small accomplishments. When your child accurately tells the time, or can work out how much change we should have from a £5 note, recognise their achievements. This will foster confidence and a love of Maths!

FIND MATHS IN THE WORLD

Maths is all around us! Point out shapes, patterns, and numbers during walks, outings or even while watching TV. Encourage your child to observe and ask questions to nurture their curiosity.
